Cælestial Diary:

O R A N

EPHEMERIS

For the Year of our Blessed
SAVIOUR's Incarnation,

1 7 2 2.

It being the Second after Bissextile, or
Leap-Year. And from the Creation of the
World, according to the best of History, 5671 Years.

Wherein is contained,
The Motion, Aspects, and Operation of the Pla-
nets, with Astrological Observations upon the Eclip-
ses, and Solar Ingresses; with many other remarkable
Passages, as the Moon's Southings, Sun, Moon and
Stars Rising and Setting, Monthly Observations, &c.
calculated according to Art, and referred to
the Meridian of the midst of GREAT-BRITAIN, fit-
ting the whole Monarchy without sensible Error.

by SALEM PEARSE, Student in Phy-
sick, and the Cælestial Science.

will behold the Heavens, even the works of thy Fingers,
the Moon and the Stars which thou hast ordained, Pl. 8.

IMPRIMATUR, W. B. August 22. 1721.

LONDON, Printed by J. Dawks, for the
Company of STATIONERS, 1722.

Ephemerides.

Courteous Reader.

IN these following Sheets (which being the fourth Impression,) I have (according to my former Method) presented thee a compleat Body of my Astrological Judgments or Predictions, on the Effects of the Cœlestiall Wanderers, (in the ensuing Year 1722.) which are now moving in the Heavens for Signs and for Seasons, as the most High hath ordained, shewing us by his heavenly Works, divers Signs and Wonders in the Firmament, to awaken Sinners from the Error of their Ways: Strange Mutations and Alterations happen to many Kingdoms and Countries, which are shew'd us by his Starry Messengers, but we like Stiff-necked People, are apt to entertain such Thoughts as tho' God doth not behold our misdeeds, or else we think that those lights or apparitions (or any thing else which the Divine Providence thinketh fit to send) to be but of little Value in Mundane Affairs, till God's Wrath and Anger is kindled against the Sins of Men, and he is (in one kind or other) pouring it upon the Earth; therefore let us my Friends and Countrymen consider, how brave and well we have hitherto escaped those sad Afflictions which other Nations have been lately afflicted with, and then instead of having a correcting hand, (if we repent of our by past life) shall have Mercy and Favour shew'd unto us from above, &c. Otherwise we may expect Punishment according to our deserts, &c.

Farewell,

July 29th
from the
County of
Berks near
the White-
horse.

I am (kind Reader) thy
Faithful Servant,

SALEM PEARSON

Amator Studiorum.

Notæ Vulgares:

O R,

Common Notes for this present

Year 1722.

According to both Accounts, viz.

<i>Julian,</i>	<i>and</i>	<i>Gregorian.</i>

Kings they are Persons of a High degree,
 Yet must submit to Death, we plainly see,
 (Tho' it be said a King doth never Die,
 It is because another doth supply
 His Royal Seat,) or else why should we here,
 Write down those Names of such who disappear?
 Therefore sweet Jove grant GEORGE whilst living be,
 May have true Peace and sweet Felicity.

January hath XXXI Days.

Behold the Darksome Season of the Year,
 Dame *Vesta* doth in mournful Drefs appear,
 Bereft of her fair Colours lately seen;
 Whose Rayment Equal'd with a Worthy Queen:
 Must now submit to Turbid Sleet and Snow,
 With Naked Breast *Boreas* thereon to Blow.

Monthly Observations.

Auspicious.

This Year seems to begin ve-
ry pleasantly; for the Heavens
send forth shining Rays, and
when the celestial Bodies agree,
there is some hopes we should
be the like. Yet we are too
subject to repine against the
Actions of our Superiours, and
those that are in Authority
over us; nor is it possible
our Governors should be able
to satisfy the desires of every
individual Person: Therefore
let us observe this gentle ad-
monition, to be calm and o-
bedient, and endeavour to pro-
tect and promote the Power
and Authority that has hither-
to preserved us in our just
rights and liberties; then shall
we have true Peace and Tran-
quility in our hearts and
minds—otherwise we may ex-
pect not only severe pu-
nishment and correction, but
much horror and confusion,
from the Righteous GOD;
which know all our Thoughts
and Actions, &c.

February hath XXVIII Days.

Hold Aged Winter, hold thy mighty Hand,
And view how Things are now at thy Command:
The Fields are bare, Trees dry, no Leaves their Grace,
The Fowls and Cattie shrink, and Human Race:
Vesta's afflicted, *Flora* cannot see,
And *Tellus* weeps at *Boreas* Cruelty.

March hath XXXI Days.

Rouse quick bright Sol, and mend thy winged speed,
For *Vesta* now and *Flora* stands in need,
Of thy warm Rays, who are both numb'd and sad,
And for long time they have no Pleasure had;
But now comes *Verna* with a dauntless face,
And crys, Winter Adieu, and takes his Place.

Monthly Observations, &c.

The general Actions of this Month are managed and carried on with a sort of Subtlety; many Persons are active in hatching mischief; and Divers People in these as well as other Countries of Europe, perplex themselves with strange Ambiguous Thoughts: Many secret Consultations are about this time—and several Guilty Persons do now fear their dark Designs will suddenly be discovered, and their unworthy Persons exposed to publick censure: All we can say to this is, let them suffer according to their merits.

But notwithstanding these Circumstances, we shall hear of very sober and deliberate Councils and Consultations also.

Good News arrives to England Annun. B. V. Mary. land a little after the middle hereof: The Glorious Δ of Sol and Jove, from γ and ζ , gives us fair Promises, and the Δ of μ and η , much befriends England, &c.

April hath XXX Days.

Rouse up sweet *Flora* early in the Morn,
And speedily the specious Fields adorn,
With divers Colours pleasant to be seen;
Let *Vesta* be Arayed like a Queen:
Tellus thy Joys Commenced are we see;
For thou art clad with *Flora's* Livery.

B

June,

JUNE hath XXX Days.

Now's come the height of the Refulgent Spring,
 Birds and young Virgins make the Vallies ring;
 With such sweet Songs, (tho' some may disappear)
 Doth charm the Hearts of divers Swains to hear:
 Whil'ft that Ominto takes the Groves for Air,
 Who is a Goddeſs and of Beauty fair.

The Aspects of the Planets (this Month) are all of a benevolent Nature, which in stary Dialect promises much Quietness and Satisfaction among the People in general.

Now all matters tend to Unity, Amity, and Concord, also Tranquility.

Many deserveing Persons, for their Trusts and Loyalty, are about this time, honourable prefer'd, and advaced.

Many hopeful Intelligences arrive from several parts of Europe, especially Merchants, and such Persons who venture their Estates in foreign Parts --- Now there are divers Meetings, or Assemblies, of Sober, Worthy Men, about this time; who, by their deliberate Consultations, endeavour to prevent all Danger, which we may accidentally fall under --- The good Hand of Providence seems to direct the Counsels of England.

B 2

July

JULY hath XXXI Days.

Replendent Summer, now is at full Height,
 Adorn's Pomoia's Head with Beauty Bright;
 Friga her's fair and fine: Sylvanus too,
 By Crystal Streams, both may their Joys renew:
 Minerba cry's her Evidence doth Claim,
 All Arts (which first) was born of Zeus Brain

This Month usually proves a season for much Business among Husband-men, to Reap down their Fields of Corn, but now in all probability there should happen more Work than reaping the Fields; especially for some discontented Persons, that had rather to be Fishing in Troubled Waters, to disquiet their honest Neighbours: The Squar of Saturn and Mars at the beginning hereof, never shew'd any good to any Country under their Influence, then how can we expect it now? former private Councils and Consultations begin to be apparent, also many Disgusts, or Secret dislikes do now manifest themselves, as great Contests amongst Men, Quarrels, hot Disputes, Law-Suits, and Robberies, &c.

Yet we hope the good Stars will much Mitigate the Malignity of the Evil; for 'tis usually so.

SEPTEMBER hath XXX Days.

Alas Dame *Vesta* ! what's the Matter here,
That all thy Joys together disappear ?
Tellus and *Flora* weeps ; *Minerva* sees,
And seems to Mourn at all your Miseries ;
Which are Commencing ; for bright *Sol* is on,
The *Equater*, and quickly will be gone

Monthly Observations.

The Configurations of the Planets, this Month are many, but most of them are of a benevolent Nature, yet the Quartile of Saturn and Mercury, and the Conjunction of Mars and Mercury, will doubtless put forward some cheating and under hand Dealings. House-breaking and Robbing on the Highways.

Mars and Mercury in a Cardinal Sign, should in all probability give forth a Report of ill Actions, from divers Parts: Yet I cannot judge (that is to say) how this Month should prove much unseasonable for the Husband-Man, nor tend much from Peace and Tranquillity; for most of the Stars are in a Peaceable Posture; therefore Heavens Bless this Nation, and preserve it from all Evil; and give the People herein a heart that they may consider their latter-end.

October

OCTOBER hath XXXI Days.

Toward the Antartic Phæbus doth High,
 Leaving us here in Grief and Misery :
 Whilst standing we may easily behold,
 Th' approaching Season Dark and very Cold :
Sylvanus frowns, *Borcas* bears him Spight,
 And *Vesta* she's bereft of all Delight.

NOVEMBER hath XXX Days.

Pomona now is robb'd of all her Pride,
 And Golden Fruit, against cold Winter-Tyde;
Sylvanus he tho' great, of late's become,
 Poor (and oppress'd) like to a Skeleton:
Tellus and *Vesta* both are sadly cross'd,
 Thro' Barren Winds and of en Hoary Frost.

Nothing becomes Authority so well as a grave and Sober Moderation. But busie Spirits will endeavour to make uneasiness amongst their Neighbours and Country-men.

Yet let such Persons beware, for they will assuredly find Misery for so doing in the End.

All Men know that the Common People judge of Persons and things by the Issue and event; and we may daily experiment this Truth, that their Love lies violent upon a flourishing Object, and their hate as cruel to them whom adverse Fortune, hath Eclipsed or Overthrown.

But now we have great hopes that things are in good Order to the general Satisfaction of the whole Nation; therefore let us render Thanks unto God, who is full of Mercy.

Extremum Anni.

As we are drawing near
 the end of the Year; so all
 may we (Probably) desire to have
 all Troubles and Calamities like
 wise than to conclude and end
 but in all probability we shall
 find it otherwise; for (accord-
 ing to *Scientia Stellarum*), we
 have no less than six Conjunctions
 of the Planets, all in Sagittarius
 and all of a Malevolent Nature
 from whence springs much evil
 to Human-kind: Three of these
 Conjunctions happens at the
 New Moon, viz. The Conjunction
 of Saturn and Jupiter, at
 Conjunction of Saturn and Mars
 and Conjunction of Jupiter and
 Mars; which Politicians (accord-
 ing to the laws of Astrology)
 are looking with a sour Coun-
 tenance, but I cannot insist
 upon the Judgment thereof, be-
 now for want of Room; there
 is Work enough cut out
 to fill a whole Volume.
 God preserve this Nation, ☿

DECEMBER hath XXXI Days.

Oh Doleful Season! Who can thee Embrace,
That looks so Torvid with an ancient Face?
Thy Locks are White, and Indigent and low,
Thy fare is Hail, and Sleet, and Woolly Snow;
Thy Bed is Ice, no Curtains have to Spread,
Too keep *Boca's* from thy Naked Head;
Than (Countrymen) you that would not be poor,
Must observe th' Ant or else you will be sure, &c.

	1000	2	10	0	4	3	4	8	3	8	12	10	0	25	0	0	57	10	0	50	0	

The Use of this Table is plain and easy to be Understood ; if you are but to look in the Left Hand Column under *Libra* for your Sum, and over Head (where if you carefully Observe a Mind, you cannot well make a mistake) for your Time and in the Angle of meeting you will have your desire. Yet I will add one more Example.

Suppose the Sum were 20 lb. I enter under *Libra* with the same and against the Sum I find for One Week 5 d. for one Month 1 s. and 8 d. for Two Months 3 s. and 4 d. for Three Months 5 s. And so on for the Rest.

Notice hands for a Quarter of a part, b for half a part, and c for Three Quarters.

To find the Hour of the Day by this Table.

Take a Staff of what length you please and (with a pair of Compasses) divide into 10 equal parts. Marking them upon the Staff; then in some plain level place, where the Sun doth Shine) set it upright, and mark where the end of the shadow falls, which done, measure with the Staff the length of the Shadow, and note carefully the Number or Parts contain'd, with which you must enter the Table, against the day of the Month, and over head you have the true Hour of the Day.

—mple.

A Chronology, &c.

Example.

Suppose the 20th of April or 2d of August, I should find the shadow contain 12 times the length of my Staff, (or 12 Parts) then seeking in the Table against the Explanation of the foregoing Table.

The said days, I see over-head, that it is either 9 a Clock in the Morning, or 3 a Clock in the Afternoon; so that if the Observation was in the Morning, it was 9, but if in the Afternoon, 3 a Clock.

By this Example, you may see the Case, and Excellent use of the Table, which is as ready as any Moveable Sun-Dyal; so that wheresoever you are or Travel, you may (having this Book about you) know the true Hour of the Day, &c.

Note, (Reader) On Tuesday the 13th day of June, (in Buseat Church-Yard, in the County of Berks) was then opened the Grave of Susanna Jenner, (to bury her Husband) where was found the Coffin whole; (then wondering) the Neighbours opened the said Coffin, wherein was found the Body of Susanna (aforesaid) all intire, except the Top of her Nose, and Lip. (who had been buried 75 Years and upward) yet her Face look'd as tho' she had not been buried above a Week, and the Herbs but little withered, &c.

Astrological Observations.

Of the *Eclipses* that will happen this
Y E A R 1722.

Within this Years Revolution, there will happen five *Eclipses*, three of the Sun, and two of the Moon; the first two of the Sun will not be seen at *London*, they fall in Order as followeth.

The first is a solar Defect; which happeneth on *Saturday* the sixth Day of *January*, at eleven in the Forenoon, not visible to us, by reason of the Moon's great South Latitude. It will only be seen in the Southern Parts of the World.

The second Eclipse is also of the Sun, and happens on *Saturday* the second Day of *June*, at eight in the Evening, Invisible; in twenty two Degrees of the Twins.

The third Eclipse is of the Moon, and Visible, (if Clouds interpose not) on *Monday* the eighteenth Day of *June* in the Morning, (according to *Scientia Stellarum*) as follows.

	d.	h.	m.	s.
Hence the apparent time at <i>London</i> of the	17	12	19	50

This

Astrological Observations.

This Eclipse we find will be Total with Continuance, and falls in six Degrees of *Capricorn*, a Earthly, Feminine, Solstitial, Cardinal, Moveable Sign, and Posited in the eighth House; this denotes Earthquakes, and much unhappiness of eminent Men, and divers People will be addicted to Ramble, and to sports of the worser sort; also signifies Blighting Winds, Caterpillars, and pernicious Air to the Fruits of the Earth, and being in the House of Death, and Dignities of *Saturn* and *Mars*, denotes the Exit of divers Persons, besides much Trouble in Marriage Affairs, and being in Square to *England's* Ascendant, should in all probability give this Nation a Taste of her Malign Ray; therefore, if we could but observe the Hand of God, we may see, that he forewarns us by his Instruments; but we, like stiff-neck'd People, will not regard God's handy Works, but are coveting for those things that perish.

The fourth Eclipse is of the Sun, and (if the Air be clear) will be part visible at *London*; it will happen on *Tuesday November* the twenty seventh, at 5 Minutes past one in the Afternoon, the Eclipse will begin, and at fifty eight Minutes past two will be the middle, or greatest Obscuration; at which time there will be darkned five Digits, and forty seven Parts on the South or lower side of the Sun's Body. The end of the Eclipse will be at four in the Evening; when the Sun have been set a few Minutes: So that near one Digit of the Eclipse will prove Invisible.

This Eclipse is made in sixteen Degrees of *Sagittarius*, and falls in the 7th House, in which there are no less than five of the seven Planets with the Dragon's tail; from whence springeth Seeds of Discord; divers Troubles, Crosses, and Losses, to the Commonwealth,

Astrological Observations.

monalty, stirs up many tedious Law-Suits, and many Differences are like to arise amongst Married People; it also denotes detriment to Noble Men, Murders, Thieving, and Robbing on the Highways, Depopulation, Abortions to Women with Child, Malignant Fevers, Destruction to great Cattle; especially Horses, but we hope that *Jupiter* in his Domicil Dignities in Conjunction with the Luminaries; at the same time will in some Measure mitigate the Malignity of the Evil aforesaid. The chief Places where the Effects of this Eclipse in particular fall on, are, *Spain, Hungary, Slavonia, Moravia, Arabia, Felix, and Luda in Hungary, &c.*

The fifth and last Eclipse, this Year, happens on *Tuesday December eleven*, and 'tis a partial Eclipse of the Moon, the beginning whereof will not be seen at *London*; but, if the Air be clear, the middle and end will be seen: It happens in the Afternoon, according to Calculation from *Scientia Stellarum*, in order as followeth.

The beginning of the Eclipse is at twenty two Minutes, forty five Seconds past two, and the middle at thirty seven Minutes, forty nine Seconds, after three, in the Evening, when the Moon hath been risen near a quarter of an Hour. The end of the Eclipse is at fifty two Minutes, fifty three Seconds past four at Night. The Total duration is two Hours, thirty Minutes, eight Seconds.

The Digits Eclipsed are, five and thirty six Parts.

This Eclipse begins in the Ascendant, but she will spend most time of her Duration, Eclipsed, in the twelfth House, and is in the very beginning of the Tropical Sign *Cancer*. It stirs up sudden Alterations

Astrological Observations.

terations in the Air ; divers showers, and over-swell-
ing of Rivers: The common People are afflicted
both in Body and Mind, also many Vexations and
Troubles to young Women, &c. The principal
significator, of what have been aforesaid, is the
Moon, she being both Lady of the Sign and House
where the Eclipse is made. The Places subject to
the effects of this Eclipse, are *Scotland, Zealand,*
Holland, &c. York, Amsterdam, St. Andrews, Venice,
Millan, and St. Lucas, &c. Besides the Lunar
Eclipse in *December*, we have six Conjunctions of
the Planets in *Sagittary*: there happeneth among
them a very unusual \odot of the three superior Pla-
nets, *Saturn, Jupiter, and Mars* in twenty-four De-
grees of *Sagittarius*, the true \odot of h and x , ac-
cording to *Scientia Stellarum*, happeneth on *Thursday*
the twenty seventh Day of *December*, one Minute
after eight a Clock at Night, in twenty three
Degrees, forty one Minutes eight Seconds, of f ,
Saturn has then one Degree eight Minutes North
Latitude descending; and x 's Latitude is likewise
North descending; but h will be elevated forty
six Minutes three Quarters above *Jupiter*. And at
the same time *Mars* is in twenty two Degrees forty
Minutes of f , with twenty three Minutes South
Latitude ascending: therefore if the twenty eighth
Day of *December* be a clear Morning, I desire all
Ingenious Persons to view the South East Horizon,
at twenty two Minutes after six, they will then
see *Saturn* Rising, and about a Minute after, you
will see *Jupiter* Rise, and about six Minutes after
Jupiter, you will see *Mars* Rising: The like Pheno-
mena has not happened in the memory of Man, and
perhaps, the like may not happen any more, which
denotes high Differences between Kings and Princes,
their Kingdoms and Monarchies much afflicted,
Commotions, Wars, Seditions, Treasons, alterati-

Astrological Observations.

ons of Laws and Customs, strange Apparitions, Prodigious Meteors, Plagues, scarcity, and Desolation, the Death of great Men, which probably should be occasioned by Wars: because Mars, which is chief significator of War, is close in Counsel with Saturn and Jupiter, &c.

GOD who at sundry times and in divers manners, spake in times past unto the Father's by the Prophets, hath in these last Days spoken unto us by his Son, *Heb. 1.* Which Son of his (our blessed Lord and Redeemer) hath truly prophesied, that before the great and terrible Day of the Lord come, there shall be Signs in the Sun, and in the Moon, and in the Stars, and upon the Earth distress of Nations, with perplexity, the Sea and Waves roaring: Mens Hearts failing them for fear, and for looking after those things which are coming on the Earth: For the Powers of Heaven shall be shaken, *Luke 31. 25, 26.* (Loving Countrymen, have we not seen of late Year's, Meteor's, and strange amazing Lights in the Air, which continueth still) What think ye of them, my Friend, doth God cause such sights only for us to gaze on? No certainly, although our Thoughts may be stupid, and our understanding as nothing in Comparison to the Most High, yet we may but cast our Eyes upon our Neighbouring Nation, and see how it hath lately far'd with them, and if we seriously consider with ourselves, we may see, tho' we have not their Calamity, how indigent and low this Nation is become, and yet we are still as liable of those heavy Judgments and Pestilence, or Contagious Diseases, as were the adjacent Countries, by which words our Blessed Saviour doth seem to confirm the Prophecy of the Prophet *Joel, viz.* I will shew Wonders in the Heavens, and in the Earth, Blood and Fire, and Pillars of smoke, the Sun shall be turned into Darkness, and the Moon into

Astrological Observation.

into Blood, before the great and terrible Day of the Lord come, *Joel* 2. 30, 31.

I would not be thought either Millenary, or Enthusiast, Dreamer or Madman, tho' I have mentioned as touching the end of the World; for I do not presume in the least to determine the same, or have I any Astrological or Philosophical Grounds to assist me in so stupendious and profound a Conjecture.

For the Blessed Jesus himself (who could speak nothing but Truth) hath plainly told us, that of that Day and Hour knoweth no Man! And for me, that am but the meanest of Dust and Ashes, to pretend to conclude its certainty as to human cogition, would be convincible and Statute Madness, and I should thereby demonstrate my self to greatly stand in need of Hellebore, yet, with Favour, I may, I hope, a little consider of the aforesaid Text, it naturally leading me unto what I shall further say. Some Interpreters understand this Text of St. *Luke*, to intimate that the like Evils should befall the *Roman* Empire, which before happen'd unto the *Jews*. And some again do understand it literally, and to be fulfilled a little before the Last Day. Which others are pleased to contradict, because, say they, the last Day useth not to be so described, but by Fire, as in *2 Pet.* 3. 12. Further we have, as History acquaints us, that after the Death of our Blessed Saviour, it was about forty Years before *Jerusalem* was destroyed. So when it pleaseth God to make any eminent Alterations in Nations, Kingdoms, or Countries, he vouchsafes to give Notice thereof, by sending Signs as Messengers to awaken the sleepy World out of its Lethargy, unto a sense of the Sins it hath committed against his Divine Majesty, that Humanity may not murmur against God,

Astrological Observation.

God, nor yet have any Pretence of Ground whereon to implead his Justice, for striking before he gives fair Warning. Hence it was that *Herodotus* wrote, *Cum Deus puniatur*, &c. When God intends to punish a Nation or People, he is first wont to give them Notice thereof by Prodigies, or as his Divine Providence thinks fit, as was seen before the taking of *Jerusalem*, for forty Days together, as you have it in *2 Maccabes* 5. 2, 3, 4. Where every one prayed that those Tokens might turn to good: And will it not be the Duty of us, who are willing to have the Name of Christians, and I hope to likewise be so, also to consider whether we can promise ourselves more security, or claim a greater Privilege in respect of our sinning against God, than these *Jews* could? And whether we have not reason to believe that the Immortal Deities have, for Drunkenness, Whoredoms, Swearing, Lying, Cheating, Insolent, Impious Actions, &c. as great a Controversy with us, as formerly they had with *Jerusalem*, *Nineveh*, *Babylon*, &c. Therefore because God's bountiful Goodness and Mercy have been hitherto towards us, by sparing us, and the severity of his Judgments in punishing of other Nations, let us not puff ourselves up like the proud *Pharisee*, to think that we are not so unjust to other Nations that have been lately afflicted, but let us seriously consider of our by past Life and Repent of our Sins and amend for the future, and endeavour to walk humbly with our God, and let Judgment run down as Waters, and Righteousness as a mighty stream, *Amos* 2. 24. into our Hearts, than shall we be able to keep the Commandments of the most High; which in so doing we shall gain a Blessing, and true Felicity, as doth an Obedient Son, of a wise and merciful Father, which words brings me to consider.

The

Astrological Observations.

The Winter Quarter takes its beginning when the Sun toucheth the first scruple of $\nu 8$, and that is *December* the 10th, 1721. at 58 min. past 8 at Night; at which time the Mid-heaven is in the first Deg. of Π , and the Ascendant 8 Deg. of *Virgo*, Υ is in the 3d. in 25 deg. of \mathfrak{M} , \mathfrak{h} , \mathfrak{q} , \mathfrak{y} , and the \odot , are all in the 4th House, and \mathfrak{J} in the 5th, and \mathfrak{S} in the 9th. \mathfrak{B} and \mathfrak{V} are on the Cusps of the 11th and 5th Houses, and thus are the Hea. Posited at the Ingress. *Mars* in the 9th, in 7 Deg. of \mathfrak{S} , in \square to \mathfrak{J} 9 Deg. of \mathfrak{z} , denotes Weakness to young Children and Teeming Women; much difficulty in their Delivery; divers of the younger sort, according to the Positions of the Stars, should probably be afflicted with dry Coughs and Agues, &c. As for the Weather during the whole Month of *January*, according to Starry Rules, 'twill prove very pleasant, considering the Season, but in *February* we shall have variety of Weather, viz. Turbid Winds, and snow, Hail, fleet, Rain, &c. very bad Winterly Weather, and much Robbing on the Highways, &c.

The Spring Quarter begins this Year 1722, on *March* the 9th, at 10 min. after 10 at Night; at which time the very beginning of \mathfrak{M} on the Cusp of the 10th, and 14 Deg. of \mathfrak{M} Ascends, the Moon's Angler in the 7th, within Rays of a \ast of \odot in the 4th, but she at that time beholds no other Plane. Υ 's it the Ascendant. \mathfrak{y} in the middle of \square in the 8th, in \mathfrak{S} to \mathfrak{h} in the 2d. I take for an ill Position, because \mathfrak{h} and \mathfrak{S} are both of a Malevolent Nature, and Aspect likewise, from whence springs great malignity in divers Countries, and dubious Concernments, violent Feavers, Frenzies, and other Diseases are portended this Spring Quarter in many places of *Europe*, and the minds of

Astrological Observations,

of Men, and those of no mean Quality, begin to swell with Malice and discontent, from whence arise malicious Actions, and very considerable Heats among mankind, and probably some may justly complain of their hard Fates——but let not the Subjects think themselves wiser than their Rulers, &c. As for the Weather this Spring Quarter; *March* probably should prove pretty seasonable, and *April* in all probability will prove exceeding pleasant and delightful putting forward the curious spring: but in *May* we shall have Variety of Weather, and the greatest part of the month will prove unseasonable, &c.

The Summer Quarter commences June the 10th. at 9 min. past 10 at Night, at which time we have 3 deg. of ♈ Ascending in our Horizon, and 4 deg. of ♊ culminating. Mars and Luna are both Angler in the 7th the place of ♂ is 10 deg. ♏ , of ♂ 29 deg. of ♏ . ♂ 's in the 9th, in 28 deg. of ♏ . ♀ and ♂ are in ♏ in the 9th. in 28 deg. of ♏ . ♀ and ♂ are in ♏ in the 12th, and the ☉ in the 11th, ♂ 's culminating in 14 deg. of ♏ , ♏ and ♊ are on the Culps of the 6th, and 12th Houses, and thus all the Heavens Posited at the Sun's Entering ♊ . As to the Ingress now under Consideration, seems to give no new Matter, (except what is good) nor produce any thing very considerable, but that the general Actions of divers People during the whole Month of June, may tend to Unity and Concord; yet the Two Eclipses therein, especially the latter, that is of the Moon, viz. Total and Visible; which Position I take to be violent, and according to Proclus shews that a miserable Death should happen to some great Lady, &c. Carden tells us, that Eclipses in Earthly Signs (as this is) shews Barrenness, caused by Drought and want of Rain, &c. And probably June should prove very dry and pleasant, but in July the stars are more busier, which suits with the Season; yet I guess divers People will find time for other matters,

Astrological Observations.

ters, besides making their Hay, and also in *August*, than Reaping the Fields of Corn, for on the 2d of *August* we have a \square of η and δ , from \mathcal{M} and \ast ; which denotes many dubious and unpleasant Concernments, but after the 1st week we probably shall have pretty good Weather, for the Honest Farmer to gather in the Fruits of his Labour, &c.

The Autumnal Quarter begins the 12th of *Sept.* at 57 m. past 11; at which time we have 29 Deg. of \mathcal{M} on Medium *Cæli*, and 3 Deg. of δ Ascends: η and \mathcal{M} are both in the Ascendant, in \square to Luna in the 3d. And \odot , δ , η , and ζ , are all in the 10th. in \simeq . Mars, η , and ζ are nearly in \odot , and all in δ to \mathcal{D} in the 3d. which Position, (that is to say) of Luna, who beholds 5 of the 7 Planets by \square and δ from Angles. I take for a bad Omen; which denotes a very Sickly time among Young People, and also signifies high Disputes among potent People in divers places of *Europe*, &c. However we Humbly Beseech thee (O Lord) to grant our King and Nation, in general, [both High and Low] true Peace and Tranquility. *Amen.*
